NEBRASKA MENTAL HEALTH REGIONS

NEBRASKA MENTAL HEALTH CATCHMENT AREAS (C.A.)

MENTAL HEALTH INPATIENT SERVICES

State mental health inpatient services during fiscal year 1979 were provided by three regional centers - Hastings Regional Center, Lincoln Regional Center, and Norfolk Regional Center.

During fiscal year 1979 there were 3156 new admissions and readmissions to the three facilities, up 9.3% from the previous fiscal year. Of the admissions, 72% were male and 28% were female. Twenty-five percent (25%) were from Region III and 21% were from Region V. The most common diagnostic category was alcohol/drug dependence (48%), followed by psychosis (27%). The greatest concentration of admissions was in the 15-24 year age group (26%), followed by 25-34 year age group (25%).

At the end of the fiscal year on June 30, 1979 there were 614 residents in the regional centers, down 2% from June 30, 1978. Of these, 66% were male and 34% were female. Twenty-nine percent (29%) came from Region VI, and 18% came from Regions III and V. The most common diagnosis was psychosis (48%). The highest concentration again was in the 15-24 year age group (28%), followed by the 25-34 year age group (25%).

A total of 221,441 days of inpatient care were provided, with an average daily census in all three facilities of 606.7. This is an increase of 3.5% over fiscal year 1978. Hastings Regional Center and Lincoln Regional Center showed increases of 6.2% and 5.2% respectively, while Norfolk Regional Center showed a decrease of 2.8%.

COMMUNITY MENTAL HEALTH SERVICES

The community mental health system in Nebraska consists of eleven federally-and/or state-funded facilities and more than 70 community clinics throughout the state. The eleven main offices are:

Panhandle Mental Health Center - Scottsbluff
Great Plains Mental Health Center - North Platte
Mid-Nebraska Mental Health Center - Grand Island
South Central Community Mental Health Center - Kearney
Northern Nebraska Comprehensive Mental Health Center - Norfolk
Community Mental Health Center of Lancaster County - Lincoln
Blue Valley Mental Health Center - Beatrice
Pioneer Mental Health Center - Seward
Douglas County Hospital Community Mental Health Center - Omaha
Immanuel Community Mental Health Center - Omaha
Eastern Nebraska Community Office of Mental Health - Omaha

During fiscal year 1978-79 there were 15,740 persons admitted to the community mental health system. New admissions accounted for 77% of the total admissions. Total admissions were split evenly between males and females, with 50.3% and 49.7%, respectively. Ninety-two percent were white, and 4% were Black. Only 7% of all admissions came from outside of the respective catchment areas, with 3.5% admitted from other catchment areas in the state, and 3.7% being non-residents of the state or unknown. Over half of the admissions were high school graduates (52%), with 20% having some post-high school education. Alcohol/drug dependence accounted for the highest proportion of admissions (20.4%), followed by "transient situational disturbance" with 19.5%.

At the end of the fiscal year, on June 30, 1979, there were 14,492 active clients, up 2% from the beginning of the fiscal year.

Statistics for the community mental health program were provided by the Mental Health Information System (MHIS).

MENTAL RETARDATION SERVICES

BEATRICE STATE DEVELOPMENTAL CENTER

The state mental retardation inpatient system is composed of the Beatrice State Developmental Center (BSDC), which is the designated Nebraska facility for mentally retarded children and adults requiring specialized residential services and intensive twenty-four hour medical and developmental services.

Fiscal year 1979 reflected the continuing direction of Nebraska mental retardation services from an extensive use of the Beatrice State Developmental Center resident service to an expanded community-based services system. On June 30, 1979, the resident population of the BSDC was 726, down 10.1% from a year ago. There was a very slight decrease in the number of admissions, from 20 to 19. Placements were down 16% from 81 to 68. A total of 275,555 days of care were provided, with an average daily census of 755. This is a 12.1% decrease from the FY1978 average daily census of 859.

Of the residents in the BSDC on June 30, 1979, 57% were male and 43% were female. Ninety-five percent (95%) were white. Eighteen percent (18%) of the residents were under 18 years of age, 80% were 18-64 years old, and two percent (2%) were over 65 years of age. By degree of retardation, 60% were profoundly retarded (compared to 49% for FY1978), 26% were severely retarded, and 10% were moderately retarded. The most common cause of retardation was "trauma or physical agent" (22%), followed by "gross brain disease" (17%), and "infections and intoxication" (17%). Persons with a legal residence of Region VI accounted for 32% of the resident population, followed by Region V with 27%.

Of the 19 persons admitted during FY1979, 26% were profoundly retarded. Eight of the admissions were under five years of age (42%). By medical classification, "unknown prenatal influence" comprised 53% of the admissions. The highest concentration of admissions was from Region V (32%), followed by Region IV (26%).

NEBRASKA COMMUNITY-BASED MENTAL RETARDATION SERVICES

Services were provided for 3,284 clients by Nebraska community-based mental retardation services during FY 1979. According to information reported to the Mental Retardation Data System, there were 204 first time admissions, 59 readmissions, and 199 terminations during the year. Admissions were from a variety of sources including the community, Beatrice State Developmental Center, the Regional Center and privately-owned ICFs and ICF/MRs.

The six mental retardation Regions provided the following services during FY 1979: child development services including in-home instruction, infant-toddler programs, child developmental day care centers (pre-school and school age) and adolescent education programs; adult development services including initial vocation evaluation, basic skills, vocationally related instruction, work adjustment training, on-the-job training sites, work stations-in-industry, job development, job placement and employment follow-up; residential services for children and adults that vary from a structured group home to support in an independent living situation; and social services to facilitate the psychological, social, intellectual and physical adjustment and development of each individual. Supportive services were provided to meet the special individual needs of each person. They included speech and physical therapy, transportation, recreation and psychological services.

The following pages contain several tables presenting demographic and client movement information plus a breakdown of services authorized for clients during the month of June, 1979.

NEBRASKA VETERANS' HOME

During fiscal year 1979, the Nebraska Veterans' Home, with facilities in Grand Island, Norfolk, and Scottsbluff, served a total of 825 persons, down slightly from the previous year (2%). Eighty-five percent (85%) were veterans. Their average age was 72.1 years, with 71% being 65 years of age and over. Fifty-six percent (56%) served during World War II, and 39% served during World War I. Forty-five percent (45%) of the persons served came to the Veterans' Home from their private home, 34% came from a V.A. Medical Center, and 14% came from a nursing home. A total of 234,627 days of care were provided by the three facilities, up 4% from FY 1978. The average daily census was 643 (531 veterans, 112 non-veterans).

There were 203 admissions during the year, down 11% from FY 1978. Ninety-one percent (91%) were veterans. Their average age was 69.2 years, with 60% being over 65 years of age. World War II veterans made up 62% of the admissions, with 32% serving in World War I. Thirty-eight percent (38%) of the admissions came from a private home, with 35% coming from a V.A. Medical Center. Forty-nine percent (49%) required Class II care and 24% required Class III care.

During the fiscal year, 69 persons were discharged, of which 94% were veterans. Their average age was 66.1 years, with almost half (49%) being under 65 years of age. Their average length of stay from admission was 388 days.

Ninety-seven (97) persons died during the fiscal year, of which 91% were veterans. Their average age was 77.1 years, and 89% were 65 years of age or older. Their average length of stay from admission was 1,561 days.

At the end of the fiscal year, there were 659 persons residing in the Veterans' Home, up 6% from the beginning of the year. Eighty-three percent (83%) were veterans, 14% were wives or widows of veterans, and 3% were Gold Star parents. Seventy-one percent (71%) were 65 years and over, with an average age of 72.0 years. Fifty-seven percent (57%) represented World War II, and 40% represented World War I. Forty-five percent (45%) were originally admitted from a private home, 33% from a V.A. Medical Center, and 15% from a nursing home.
